# INTRODUCTION

The palm oil mills are notorious for generating huge quantities of polluting effluents which need to be treated before disposal. Over the years, various technologies have been developed for the purpose of treating the palm oil mill effluent (POME). POME, a high strength organic effluent is typically treated using a variety of biological treatment systems employing microorganisms as the "work horses". The operation of POME treatment systems (POMETSs) requires knowledge and skills in order to ensure optimal conditions are maintained for the microorganisms to thrive and biodegrade the high concentration of organic matter in the POME. Optimally operated and well maintained POMETSs will produce compliant effluents on a consistent basis hence the mills will be in legal compliance at all times. Effluent treatment systems, especially those employing biological processes such as POMETSs require close attention and monitoring because biological processes are susceptible to upsets due to changes in environmental and process conditions. Trained POMETS personnel who possess the "minds on" and "hands on" qualities are a prerequisite for successful operation of POMETSs that will minimize the adverse environmental impacts resulting from the mill operation.

The "minds on" aspects include sufficient understanding of the relevant regulatory framework and the working concepts of the POME treatment processes. The "hands on" aspects include the skills to monitor the treatment processes and assure the important factors are maintained for optimal treatment process efficiency. As a consequence, compliance with the environmental regulations will be ensured on a sustained basis.

The overall objective of this certified training course is to produce technically competent mill personnel who are also conversant with the regulatory requirements. The certified persons will be the change agents who will mainstream the environmental agenda within the palm oil industry and help to green the industry.

# COURSE CONTENTS

## DAYS 1 and 2

- Module 1 The CePPOMETS process
- Module 2 Understanding the regulatory framework
- Module 3 POME characteristics and impacts of POME discharge
- Module 4 Overview of POME treatment systems
- Module 5 The working concepts of POMETS
- Module 6 Rationale for conducting performance monitoring of POMETS

## DAYS 3 and 4

- Module 7 Performance monitoring of common POMETS
- Module 8 Maintenance of ponding systems
- Module 9 How to control anaerobic digesters

## DAYS 4 and 5

- Module 10 How to control activated sludge systems
- Module 11 POMETS maths
- Module 12 POMETS Performance monitoring laboratory analysis
- Module 13 Data analysis and interpretation
- Module 14 Record keeping, reporting, and communication
- Module 15 Field training report preparation
- Module 16 CePPOMETS: The change agent  
Comprehensive Examination  
Presentation of Certificates of Attendance

# BENEFITS OF ATTENDING

Course attendance is a mandatory prerequisite for the issuance of competency certificate as a competent person under the POMETS certification program

# COURSE METHODOLOGY

- ❖ Lectures / Discussions
- ❖ Class Assignments
- ❖ Hands on Lab and Computer Sessions
- ❖ Field Training Report Assessment

# OBJECTIVES

- ❖ To impart understanding of the environmental regulatory framework on palm oil mill operation to mill personnel;
- ❖ To impart knowledge and develop skills on the conduct of POMETS performance monitoring and evaluation of performance monitoring data;
- ❖ To produce mill personnel who possess both technical competence in POMETS operation and thorough understanding of regulatory requirements

# ABOUT THE TRAINERS

**Ir. Dr. Shamsudin Hj Ab Latif** is a registered chemical engineer who holds a B. Sc. in Chemical Eng. from Leeds University, UK., a M. Eng. In Environmental Eng. from Asian Institute of Technology, Bangkok, Thailand, and a Sc. D in Public Health, from Tulane University New Orleans, USA. Dr. Shamsudin's experience in industrial pollution control spans over 30 years with several technical guidance documents to his credit. While with DOE, he prepared technical drafts of several regulations and he was also instrumental in initiating and developing competency certification programs for the DOE's officers and the industry. Dr. Shamsudin is a certified trainer and a certified training evaluator. He also served as an adjunct professor at several universities in Malaysia. (Competent Person Serial Nos.: CePIETSO-PCP/5099 and CePIETSO-BP/5099)
