Introduction

The success of the operation of an IETS is primarily in the hands of the operator. A knowledgeable and skilled operator or supervisor knows how to monitor the processes occurring in his IETS, understands what factors affect the IETS performance, knows what operational conditions are best for his IETS and how to maintain them, knows how to respond to upset conditions, understands the social obligations and legal implications for noncompliance.

Successful operation of an IETS is an integral part of the operation of a successful industry. A trained and skilled IETS operator or supervisor is not anymore a luxury but rather a must-have to the industry. Good environmental performance does not only portray positive corporate image, but avoids possibility of factory downtime and hefty monetary penalties due to legal actions from the environmental authority. The industries must pay great attention to the training of their staff in the proper operation and maintenance of the IETS. EiMAS is providing a training program to train your IETS operators and supervisor to be competent in operating IETS particularly in conducting performance monitoring of the IETS component units. The competent operator or supervisor will ensure that the IETS is operating optimally.

This unique training course which integrates both the "minds-on" and "hands-on" aspects is in fact the only one of its kind in Malaysia. A Certificate of Competency will be awarded to participants who successfully completes the course, passes the examination and submits a field training report (FTR).

Course Contents

DAY 1

- Module 1 The Certified Environmental professional in IETS Operation
- Module 2 Understanding the Legal Framework
- Module 3 Characteristics of Industrial Effluents and Discharge Impacts

DAY 2

- Module 4 Overview of Industrial Effluent Treatment Systems
- Module 5 Physical Chemical Treatment Processes – The Working Concepts
- Module 6 Performance Monitoring of Common Physical Chemical Treatment Processes

DAY 3

- Module 8 Performance Monitoring Laboratory Session

DAY 4

- Module 8 Performance Monitoring Laboratory Session
- Module 7 Maintenance of PCP Components and Instruments
- Module 9 PCP Maths
